FEDERATION

DAY AGAINST DRIVER FATIGUE JUNE 21

DRIVERS NEED

REST!

AND SAFE RATES

Do you recognise fatigue symptoms?
Scan here to check

YOU ARE NOT ALONE. 700 BUS AND COACH DRIVERS RESPONDED TO AN ETF SURVEY, REVEALING THAT:

90% had to drive while tired.

25% reported falling asleep while driving.

57% reported being unable to stop and take a break when feeling tired.

75% reported "not enough sleep" or "poor sleep quality" as a major cause of fatigue.

What are Safe Rates?

Safe Rates are fair pay standards in road transport that:

- Allow drivers to take breaks and respect driving and work-time regulations
- Reduce fatigue and crashes, making our roads safer
- Apply to all drivers regardless of their nationality, gender, or if they are subcontracted or self-employed

Unions are winning Safe Rates agreements and legal systems that

- Include unions in setting and enforcing safe rates standards
- Require all industry actors to comply with these standards

UNIONS ARE FIGHTING FOR

Fair Pay and Better Conditions

Predictive and realistic schedules

Better resting facilities
